**Account Index:** Bloomberg Barclays U.S. Treasury Index Performance greater than one year is annualized.

Past performance is no guarantee of future success.

The objective of JKMilne Asset
Management's indexed fixed income
strategy is to match the risk and return of a
standard or customized bond index, which
may include, but not inclusive of,
Bloomberg Barclays Aggregate,
Government/Credit, Intermediate
Aggregate or Government/Credit, and any
widely used component of aforementioned
benchmarks. The inclusion of assets are
typically index issues with emphasis on
larger, more liquid issues.

<sup>\*\*</sup>Sector allocation is determined by Bloomberg PORT®, whereas our market value and performance numbers are determined by our Advent® APX accounting system. Due to slight differences in the pricing of securities (and therefore total market value), this may cause a difference of as much as 1% in the sector allocation data.
